Faculty – Clinical Senate

17 March, 13:30 – 16:00

Venue – 2nd floor Cochrane Building

Both the Faculty and Clinical Senate are forums for sharing what has been happening in Quality Improvement, Research & Development and Innovation. People and teams are invited to share what they have achieved with those who are driving those fields in the UHB and University as well as each other; and importantly anyone who would like to hear more about the achievements of others and what could be achieved.

The Faculty and the Clinical Senate have existed independently of each other until now and in March it will be the first joint event. Those that have been to previous events notice the positive experience that they have been.

At this event you will get the chance to hear from those who have delivered improvements from being involved and supported by various programmes within the UHB. Also you will be able to find out more about the support that is available within the UHB for those looking to deliver better service for our service users.

There will be representatives from:

- Continuous Service Improvement (CSI)
- Learning, Education and Development (LED)
- Leading Improvement in Patient Safety (LIPS)
- Wales Deanery (Leadership fellows)
- Programme Management Office (PMO)
- Clinical Innovation Partnership
- Service Planning

You will also have the chance to shape how this forum will develop moving forward. If you are interested please come along.
